

DESCRIPTION

This series keystone jacks exceeds the performance requirements of Category 5E standards and is compatible with the 100M Ethernet application system. It is suitable for communication sockets between devices and work areas, and can provide up to 250MHz of available bandwidth.

APPLICATION

- Available in Cat6A, T568A/B wiring, meet or exceed TIA/EIA Cat6A requirements
- Unique PCB circuit board line balance design, low attenuation loss and high return loss
- Overall zinc alloy shielding design meets the industry standards
- With T568A and T568B two common line sequences, the universal line sequence label is clearly marked on the module
- Solid and corrosion phosphor bronze IDC enables over 250 terminations
- Accept 23 AWG wires
- Up to 50 μ " gold-plated layer with contact pin contact material for 1500 insertions
- Termination caps prevent wire from dropping off, with backward compatibility of CAT 5E and lower classes
